

Lifeloc LT7 Breathalyser

The Lifeloc LT7 breathalyser is verified to AS 3547:2019, a new standard for alcohol breathalysers. This features instant test results, very quick clearing time between tests, and the ability to conduct testing in passive mode to get a quick POS or NEG result.

Who uses the Lifeloc LT7 Breathalyser?

- Occupational health & safety companies
- Medical centres who do workplace drug testing
- Workplaces who prefer to do drug testing themselves
- Employment agencies

Why choose the Lifeloc LT7 Breathalyser?

- Verified to AS 3547:2019
- Has a passive testing option, similar to police roadside testing. Means you can quickly screen test without a mouthpiece
- Sturdy and robust design, manufactured in the USA
- Uses the same platinum fuel cell technology which is used in the globally recognised Lifeloc range
- Consistently accurate across an alcohol range from 000 µg/L to 3000 µg/L
- Comes with a 12 month warranty
- Available in purchase or lease options
- Double pump sampling for greater accuracy
- Calibrated and serviced in New Zealand
- Stores up to 10,000 test results
- Comes in a water-proof, shock-proof carrying case
